

CONFIRMATION

We confirm that the company AMPATZIS IKE, Levaia, 53200 AMYN-TEO (GR) is Koemmerling-customer of profine GmbH since 1st July 2021. Customer number: 90019262

The Koemmerling windows are produced according to the profine processing guidelines.

PVC profiles of profine GmbH are currently distributed with the following protective foils: profine, Greenline, KBE, Kömmerling and TROCAL.

KOEMMERLING window and door profiles produced in the federal Republic of Germany and are monitored according to the European standard (EN 1608:2003-09) and the German RAL-goods policy.

The window frames are already consistently manufactured from virgin material without additives toxic heavy metals such as lead, cadmium or tin for years. Only the most modern and eco-friendly Ca/Zn stabilizers are used. Furthermore, the additives are pigments (e.g., titanium dioxide), impact modifiers (elastomeric polyacrylates) and fillers (chalk).

Our window profiles do not contain plasticizers such DEHP (DOP), they are rigid PVC.

Our window profiles are regularly reviewed by external institutions (RAL, CSTB, KIWA, etc.). The identification of the profiles is based on the requirements of the national organization and is largely based on the European standard EN 12608th.

If you have further questions please do not hesitate to contact us.

Best regards
profine GmbH
